

Canadians more comfortable with individuals and Indigenous Peoples owning and operating fishing licenses rather than large corporations.

Key Findings

INDIGENOUS PEOPLES

Canadians are more comfortable having Indigenous Peoples own and operate fishing licenses with their own Indigenous crews (67% comfortable) rather than Indigenous Peoples lease their communal fishing licenses to non-Indigenous fishers (15% comfortable).

INDIVIDUALS VS. CORPORATIONS

Canadians are more comfortable with individuals owning fishing licenses and be part of the crew (59% comfortable) than having large corporations own fishing licenses (17% comfortable) or acquire multiple fishing licenses (7% comfortable).

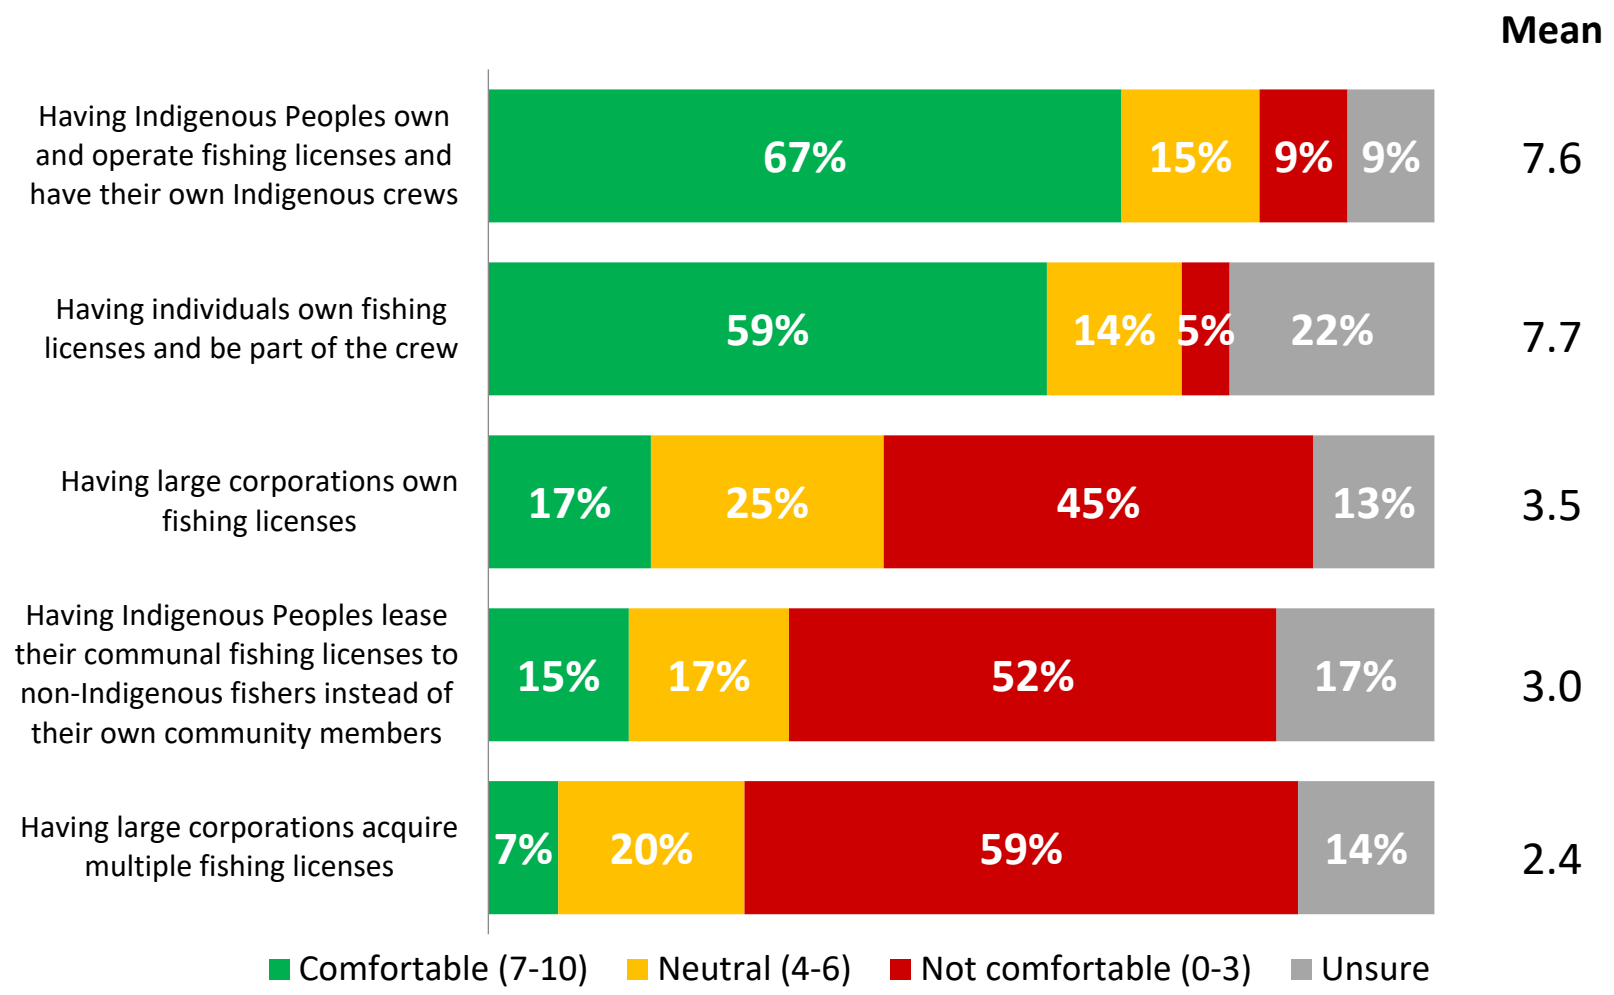

ATLANTIC REGION RESIDENTS

Residents of the Atlantic region (mean of 8.5 out of 10) are more likely to be comfortable with individuals owning licenses than residents of other regions (range of a mean of 7.6 to 7.7 out of 10)

Comfort with fishing license management elements

“ Canadians are most comfortable with having Indigenous Peoples own and operate fishing licenses with their own Indigenous crews and having individuals own fishing licenses and be part of the crew rather than having large corporations own or acquire multiple fishing licenses. ”

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,048 Canadians, 18 years of age or older, between December 27th to 30th, 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,048 Canadians is ± 3.0 percentage points, 19 times out of 20.

The research was commissioned by the Coalition of Atlantic and Quebec fishing organizations and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

| Element | Description | Element | Description |
|----------------------------------|---|-----------------------------------|--|
| Research sponsor | The Coalition of Atlantic and Quebec Fishing Organizations | Weighting of Data | The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure |
| Population and Final Sample Size | 1048 Randomly selected individuals. | Screening | Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data. |
| Source of Sample | Nanos Panel | Excluded Demographics | Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate. |
| Type of Sample | Probability | Stratification | By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample. |
| Margin of Error | ±3.0 percentage points, 19 times out of 20. | Estimated Response Rate | 14 per cent, consistent with industry norms. |
| Mode of Survey | RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey | Question Order | Question order in the preceding report reflects the order in which they appeared in the original questionnaire. |
| Sampling Method Base | The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada. | Question Content | Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views on real estate, views on COVID-19 vaccines, trade with China, the US border closure, personal finances, feelings toward and views related to the federal government, labour market information, and healthcare. |
| Demographics (Captured) | Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography. | Question Wording | The questions in the preceding report are written exactly as they were asked to individuals. |
| Fieldwork/Validation | Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online | Research/Data Collection Supplier | Nanos Research |
| Number of Calls | Maximum of five call backs to those recruited. | Contact | Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com. |
| Time of Calls | Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent. | | |
| Field Dates | December 27 th to 30 th , 2020. | | |
| Language of Survey | The survey was conducted in both English and French. | | |
| Standards | Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/ | | |
